

.crft AI-NATIVE PRODUCT BUILD

Risk & Compliance Copilot

THE SITUATION

The answer usually exists already. It is in a memo someone wrote in 2022, or in the head of the person who left last spring, and the only reliable way to find it is to ask around. So the same judgment gets made twice, differently, by two people who never knew the other had made it.

THE SOLUTION

Your policy corpus, regulatory updates, and prior decisions become a copilot that every analyst can query in plain language. It drafts memos, surfaces precedent, and checks work against current regulation — always citing its sources so reviewers and auditors can trace every claim back to the document.

01 HOW CRFT WORKS

01

Validate the core workflow in a short prototype sprint

02

Build the production-grade, owned system end-to-end

03

Hand off source, credentials, docs, and a 90-day roadmap

02 WHY IT MATTERS

- Faster, more consistent memos and reviews
- Institutional knowledge captured, not lost to turnover
- Citations back to source on every output
- Humans approve; AI does the drafting and retrieval

> *CRFT engineers the retrieval and drafting layer over your policy corpus.*
