

.crft AI-NATIVE PRODUCT BUILD

Portfolio Platform Copilot

THE SITUATION

Platform support reaches the companies that ask loudest and the ones already working. Everyone else gets a newsletter and an intro list — so playbooks the firm spent years building help a fraction of the portfolio.

THE SOLUTION

An AI extends your platform team — giving every founder on-demand help with GTM, hiring, and data using your firm's playbooks. Support that used to reach a few companies now reaches all of them.

01 HOW CRFT WORKS

01

Validate the core workflow in a short prototype sprint

02

Build the production-grade, owned system end-to-end

03

Hand off source, credentials, docs, and a 90-day roadmap

02 WHY IT MATTERS

- ✓ Platform support scaled to every company
- ✓ Faster founder help between check-ins
- ✓ Your playbooks, available on demand
- ✓ Platform team focuses on the high-touch work

CRFT builds the portfolio support layer over your playbooks.

03 FOUR WAYS TO BUILD AN AI SYSTEM — AND HOW THEY COMPARE
